

ID Scan SA USED IN WHYALLA

Licensees are required by licence conditions to scan your ID for any purchase of restricted items of liquor.

Failure to comply with these conditions may result in penalties against the licensee, including a fine, suspension or revocation of liquor licence.

ID Scan identifies people who are barred and securely records the quantity of restricted items of liquor purchased per person per day.

ID Scan SA monitors alcohol purchases for restricted items in this area over a 24 hour period and will alert the licensee when a customer has reached their daily purchase limit.

Developed by Consumer and Business Services, SA's Liquor Licensing Authority, ID Scan SA

supports licensees to comply with their liquor licence conditions for takeaway alcohol.

ID Scan aims to minimise harm to vulnerable persons through the excessive consumption of liquor and prevent the supply of liquor to dry communities within South Australia.
